ELECTRO KNX BUS SYSTEM

- KNX is the World's Only Open STANDARD for Home and Building Control
 - More convenience, more safety, higher energy saving
 - Via the KNX medium to which all bus devices are connected (twisted pair, radio frequency, power line or IP/Ethernet), they are able to exchange information. Bus devices can either be sensors or actuators needed for the control of building management equipment such as: lighting, blinds / shutters, security systems, energy management, heating, ventilation and air-conditioning systems, signaling and monitoring systems, interfaces to service and building control systems, remote control, metering, audio / video control, white goods, etc. All these functions can be controlled, monitored and signaled via a uniform system without the need for extra control centers.
- More Info: - www.knx.org

GIRA - INFOTERMINAL TOUCH

THE CONTROL UNIT FOR THE HOME SERVER

the Gira InfoTerminal Touch is now network-capable: - Attendance simulations - Astro timer - Alarm function - error messages by e-mail - News services - Charts
